

INDEX OF TABLES AND FIGURES

TABLES

INFOCUS

Table 1.1: Decomposition of the 14 percentage points difference in employment rate between the EU-15 and Hungary	43
Table 2.1: Number of students graduating with a baccalaureate exam, number of students applying for admission to higher education 1990–2002 (in thousands)	51
Table 2.2: Participation in basic education and supplementary training by educational attainment (per cent) aged 15–74	56
Table 2.3: Participation in basic education and supplementary training by age-groups (per cent)	57
Table 2.4: Participation rate in basic education and supplementary training by highest educational attainment in age groups 15–20 and 21–30 (per cent)	57
Table 2.5: Distribution of participants in supplementary education by highest educational attainment by types of education or training (per cent)	58
Table 2.6: The impact of cost-priced education on labour market status and wages	67
Table 3.1: The determinants of the schooling decision after primary school	71
Table 3.2: Determinants of application for further studies	80
Table 4.1: Distribution of entry occupations by the time of labor market entry, and the distribution of the occupational structure in the same periods (per cent)	84
Table 4.2: Changes in the odds for labor force entry and for the character of the entry jobs between the eighties and nineties	86
Table 4.3: Distribution of students according to their plans to start working/continue their education, and their labour market status after leaving school (per cent)	89
Table 4.4: Continuing education after secondary school by characteristics of students (per cent)	91
Table 4.5: Parameter estimates from wage equations	96
Table 4.6: Determinants of labour market status, marginal effects	98

Table 4.7: Determinants of training participation, training length and cost-sharing of training	106
Table 5.1: A simple model of migration probability – fixed effect logit estimates	111
Table 5.2: 15–49 years old population and education of those who consider migration (per cent)	114
Table 5.3: Effect of education, age and gender on the probability of migration decisions	115
Table 5.4: Effect of actual profession, education, age and sex on the probability of migration decision	116
Table A1.1: Detailed OLS results. Dependent variable: logarithmic earnings. Education entered years completed	118
Table A.1.2: Detailed OLS results. Dependent variable: logarithmic earnings. Education entered in three categories (reference: 8 grades or less) ..	118
Table A1.3: Employment rate and educational attainment of men aged 25–64 in Hungary and in the EU (15), 2001	119
