

# List of tables and figures

## Tables

- [11] Programmes that can be launched in the short term in the intervention areas identified in the summary ■ 30
- [App. 11] Members of the Round Table for Education and Child Opportunities ■ 34
- [App. 12] Events listing for the Round Table for Education and Child Opportunities (OKA) ■ 35
  
- [1.1] Risk factors and developmental outcomes – a summary of recent studies ■ 41
  
- [3.1] The distribution of students according to level of scientific proficiency as measured by the PISA survey of 2006 in OECD countries (per cent) ■ 93
- [3.2] Examination applications in the *Matura* period May–June 2007 ■ 97
  
- [4.1] The distribution of students enrolled in vocational training schools as a function of their fathers’ educational attainment (per cent) ■ 107
- [4.2] The most difficult tasks according to teaching staff at the three school types (per cent mention) ■ 110
- [4.3] Average results of the PISA survey by school type ■ 111
- [4.4] The distribution of secondary school leavers according to labour market status one year after leaving school (per cent) ■ 115
  
- [5.1] The characteristics of depressed micro-regions (proportions of categories) ■ 134
  
- [8.1] Teacher competences as set out in EU documents and in Hungarian regulations ■ 205
  
- [11.1] Employment status of parents with six year old children (average values, 2003–2006) ■ 270
- [11.2] The distribution of men and women with 0–8 years of schooling aged 25–44 according to employment status and major income transfers (2003–2005) ■ 274

- [12.1] Estimated teacher workforce with current and adjusted pupil to teacher ratios, 2011 and 2015 ■ 290
- [12.2] Teaching staff calculations Estimated teaching staff in three scenarios: based on the funding formula of September 2007; with average class sizes as specified by the Public Education Act (PEA); and with previous statutory teaching hours ■ 294
- [12.3] Basic central public education grants per pupil and in total in 2007 (calculated according to the formula of September 2007 with average class sizes as specified by the Public Education Act and with previous statutory teaching hours) ■ 295
- [12.4] Cost reducing and cost increasing factors ■ 296

## Figures

- [1.1] Determinants and risk factors of early child development ■ 43
- [1.2] Causes related to poor performance at school ■ 43
- [App. F1.1] Pathways to school readiness and risks ■ 57
  
- [2.1] The development of technical reading skills ■ 69
- [2.2] Results of a developmental intervention in the middle and pre-school years of kindergarten ■ 70
- [2.3] Results of continuous criterion-referenced developmental intervention in year 5 ■ 71
  
- [3.1] Percentage of students learning English at secondary school in the countries of Europe (per cent) ■ 93
  
- [4.1] Proportion of at-risk students by school type, 1990–2006 (per cent) ■ 109
- [4.2] Percentage of students with behavioural and social adjustment difficulties ■ 109
- [4.3] Percentage of grade repeaters by secondary school type, 1990/91–2006/2007 ■ 111
- [4.4] Percentage of dropouts by school type, 1990/91–1998/99 ■ 112
- [4.5] Distribution of 10th year students and dropouts by parents' highest educational attainment (per cent) ■ 113
- [4.6] Distribution of 10th year students and dropouts by parents' labour market status (per cent) ■ 113
- [4.7] The returns to education, 1986 and 2002 ■ 115
- [4.8] Vocationally trained workers' wages relative to secondary school graduates' wages as a function of age/experience, 1972, 1982, 1986, 2002 ■ 117

## LIST OF TABLES AND FIGURES

- [4.9] Percentage of job mismatches among graduates of secondary vocational programmes in selected EU countries, 2000 ■ 118
- [4.10] Percentage of companies offering in-service training in EU countries, 2000 ■ 121
- [4.11] Proportion of vocational training school leavers dissatisfied with their labour market prospects as a function of parents' educational attainment (per cent) ■ 122
  
- [5.1] Proportion of Roma students in various class types, 2000, 2004 ■ 139
- [5.2] Proportion of ward of the state students receiving special education, 2004 ■ 139
- [5.3] Percentage of students attending non-district schools as a function of mothers' educational attainment, home settlement: fewer than one thousand inhabitants ■ 142
  
- [6.1] Distribution of educational needs ■ 155
- [6.2] Services for special educational needs (SEN) as specified by the amendments of 2007 to the Public Education Act (PEA) ■ 159
- [6.3] A standard international model of diagnostics for Special Educational Needs (SEN) ■ 163
- [6.4] The distribution of SEN (based on the categories used before the amendment of 2007 to the Public Education Act) according to school type ■ 168
- [6.5] Brain functions ■ 169
  
- [7.1] The outcome variables of the cross-sectional (CS) and value added (VA) models ■ 183
- [7.2] The cross-sectional (CS) model ■ 184
- [7.3] The value added (VA) model ■ 186
- [7.4] The interpretation of fixed school effects and the stability of results ■ 188
  
- [10.1] Primary school expenditure per pupil and average income per inhabitant for quintiles by average income of villages and towns, as a proportion of the middle quintile, 1992–2005 ■ 247
- [10.2] Between and within local governments standard deviation of per pupil primary school expenditures (local governments with more than one school) ■ 247
- [10.3] Teachers' salaries with 15 years of experience as a percentage of GDP per capita and pupil/teacher ratios in primary and lower secondary education (ISCED1-2) in OECD countries, 2005 ■ 252
- [10.4] Pupil/teacher ratios at kindergartens and primary schools by settlement type, 1991–2005 ■ 252

- [10.5] Pupil/teacher ratios at primary schools by quintiles with respect to demographic change in towns and villages, 1991–2005 ■ 253
- [10.6] Qualified teachers' salaries as a percentage of all graduate salaries by years of experience, 1989, 2001, 2005 ■ 254
- [10.7] Qualified teachers' salaries as a percentage of equivalent level graduate salaries by years of experience, 2005 ■ 255
  
- [11.1] Participation in adult training and participation rate among the low-educated in ten European countries at the turn of the millennium ■ 276
  
- [12.1] The size of the population under 25 years of age (as of January 1st, 2006, thousand persons) ■ 287
- [12.2] First year primary school pupils and first year undergraduates, 1960–2006 ■ 287
- [12.3] Population size projection for children aged 0–18 by age cohort (2001 = 100) ■ 288
- [12.4] The expected effects of demographic change on the overall expenditure of educational institutions with current participation rate and per-pupil spending, 2005–2015 (2005 = 100) ■ 289
- [12.5] Number of pupils per teacher in primary and secondary education in Hungary and in the 19 EU countries, 2004 ■ 289
- [12.6] Number of children enrolled at local government maintained kindergartens and primary schools, and pupil to teacher ratios at local government maintained kindergartens and schools, by administrative status of the settlement, 1991–2005 ■ 291
- [12.7] Expected number of pupils in primary and secondary education with 2007 participation rates held constant and with expanded kindergarten and foreign language year services, 2007–2020 ■ 297
- [12.8] Expected basic central budget funding and the supplementary funding for bilingual education with participation rates held constant for each cohort and with expanded kindergarten and foreign language year programmes by school year, 2007–2020 (billion forints) ■ 298
