

The 'Momentum' Game Theory Research Group of the Hungarian Academy of Sciences invites you to:

Workshop on Networks and Externalities

Budapest, 6-7 June 2013

Following the success of the SING8 conference in 2012 we are organising a small 2-day workshop in Budapest on the topics networks and externalities. The workshop deals with game theoretic models of networks, coalitional games with externalities, the combination of the two as well as topics such as flow games, matching or coalitional games in general. Theoretical and applied papers are all welcome.

The keynote speakers are **Lars Ehlers** and **Rajiv Vohra**.

There is no registration fee, but registration before 31 May is required. The number of participants may be limited. For presentation please send abstracts or full papers to next@krtk.mta.hu, preferably before 6 May.

Further information will be available at: <http://econ.core.hu/next.html>
